Cyndi Ingle is the creator and innovator behind the award-winning and globally recognized CyndisList.com, a free categorized list of more than 337,000 links for genealogical research. Cyndi, a genealogist for more than 42 years, has an expertise in using technology for genealogy. Additionally, her many active years in genealogy have also resulted in specialties for research in the United States and bringing together traditional methodology with organization, computers, software, and the internet. Cyndi is the recipient of several awards and honors, she has served in several capacities for genealogical organizations, she is an internationally-known guest lecturer, and she has authored numerous articles and three books.

“Mastering Digital Filing for Genealogists”

Every genealogist feels that digital filing is out of their control. It can be an overwhelming process to keep track of all of the documents, images, and files that end up on our computers and devices. How do we even tackle this virtual pile of filing? What tools and processes will work best for you? We will discuss all of this and how to maintain digital filing as we research.

“Pin Your Ancestors Down with Google Maps and Google Earth”

Google Maps and Google Earth provide two wonderful sources for geographical assistance in tacking your ancestors and pinning them down for your research. Combined with other mapping resources online we will demonstrate how using these Google tools can give you a visual aid for your research. Follow migration paths, historical routes, and your own family’s path, marking them on the maps with information, photos and documentation.

“Tracking Your Digital Bread Crumbs: Bookmarks, Toolbars, Notes, and Other Applications”

Clicking links means you can start off on a web site for one specific topic and end up dozens of web sites away on many different topics. It’s easy to get lost and lose focus on what you were trying to find in the first place. And with so many web sites to use in your research, how do you keep track of them all? How do you organize what you use regularly? How can you get back to a site at some point in the future? We have several ways to help you gain control of your digital bread crumbs.
